## Projects

### Beep Beep Ride-Sharing App
Jan - Apr 2019

*Designer and Front-end Developer*

- Produced user flow chart and working prototype using Adobe XD in a timely manner
- Participated in ideation sessions with 3 other team members in order to create a user-centered design for the app

### "CustomHighze" Web Application
Oct - Dec 2018

*Designer and Front-end Developer*

- Collaborated efficiently on a team of 3 members through ideation sessions and producing solutions
- Developed an empathy map with team members in order to better empathize with the user
- Created the user flow chart, wireframes and final designs
- Conducted 4 user interviews in order to pinpoint areas of improvement for the application

### Domino's UX Case Study
Nov 2018

*Researcher and Designer*

- Video recorded a user during a user-testing session and documented all reactions and feedback as data
- Re-designed and developed mid fidelity wireframes of Domino's online web ordering application based on the collected user feedback

## Work Experience

*Freelance Illustrator*
Apr 2018 - present

- Successfully planned and painted a mural for a tea shop in Toronto called "Labothery"
- Designed and created personal merchandise from scratch such as paintings, zines, and prints in order to be sold at art fairs
